Education

Indian Institute of Information Technology (IIIT) Vadodara – ICD

Dec 2021 – Aug 2025

B.Tech in Computer Science & Engineering

CGPA: 8.00 / 10

Profile Summary

GenAI Software Engineer with 2+ years of experience architecting production-scale AI chatbots, LLM applications, RAG systems, and AI agents for Fortune 500 clients including Pfizer, Reckitt, Kenvue, and Compass

Experience

Sigmoid

Jan 2025 – Present

Associate Software Engineer — GenAI & Full-Stack (Jul 2025 – Present) | [Explore My Journey ↗](#)

Bengaluru, India

- **Architected 6 production GenAI chatbots end-to-end** (Fortune 500 clients) using **LLM inferencing, RAG, tool calling & prompt engineering**: Pfizer HCP portal (RBAC + voice-note transcription + AI call summaries), Compass Data Companion (**LLM + SSE streaming**), Kenvue CEO dashboard (**Power BI SDK → LLM context sync**), MD Johnson Markdown assistant.
- **Delivered Atlas Companion GenAI assistant (Reckitt) in 72 hours**: **LLM token-streaming** via WebSockets, **multimodal AI outputs** (NL → SQL, charts, FAQ), **RAG retrieval**; architecture reused as **GenAI template** across 5+ client chatbot programmes.
- **Built GenAI model integrations & Databricks ML layer** for Trade Promo Optimiser (Kenvue): **AI-driven discount recommendation engine** predicting next-year sales; **LLM-augmented** scenario simulation on 6 FastAPI microservices eliminated manual spreadsheet planning.
- **Built Data Product Marketplace** (Kenvue): RBAC wizard, Snowflake–Databricks lineage graphs, **LLM-powered** data-quality summaries; **reduced feature delivery ~40%** via shared React/TS GenAI streaming component libraries across 5 teams.

Mercor

Jan 2026 – Present

AI Model Evaluator — GenAI Red-Teaming (Contract)

Remote

- **Pre-release red-teaming of frontier LLM (Claude Octopus)** across 10+ **Git repos**: stress-tested **code** generation, **agentic tool use**, **multi-step reasoning & AI safety guardrails**; findings informed model alignment.

Selected Projects

Trade Promo Optimiser — GenAI + ML Sales Prediction Platform | [Explore TPO ↗](#)

2025

- **Designed 3-layer AI pipeline** (constraints → **LLM+ML optimise** → **AI simulate**): GenAI-augmented discount recommendations via Databricks maximise sales/NTS/C-ROS; **AI-powered what-if simulation** validates spend before commitment; Scenario Manager ships side-by-side **LLM-narrated KPI comparison** (K-ROI, Volume Lift, i-NTS) — **eliminated 100% of manual spreadsheet handoffs**.
- **Trained and integrated the demand forecasting model** (Databricks): combined product, mechanic, and timing variables into thousands of feasible promo scenarios; **GenAI-assisted constraint engine** enforces brand budget, promo spacing, PPG consistency, ROI threshold, and duration rules before the solver runs — making the optimiser fully autonomous end-to-end.
- **Built the AI recommendations output layer**: solver returns an **optimised promo calendar** (SKU × week grid) alongside **LLM-generated DO MORE / YIELD / STOP strategic insights** (e.g. “invest more during Holidays”, “reduce gap between promotions of same SKU”) — **replacing manual analyst commentary** with automated, margin-maximising guidance for Kenvue planners.

Technical Skills

AI / ML & GenAI	LLM Inferencing, Prompt Engineering, RAG, AI Agents, Tool Calling, LangChain, Streaming UX (SSE/WebSockets), Multimodal AI, PyTorch, TensorFlow, Transformers, Databricks, XGBoost
Languages	Python, TypeScript, JavaScript, SQL, C, C++
Frontend	React, Next.js, Tailwind CSS, MUI, Recharts, Plotly, AG Grid, Redux Toolkit, Framer Motion
Backend & Data	FastAPI, Node.js, Express, NestJS, PostgreSQL, MySQL, MongoDB, Prisma, Redis, WebSockets, RBAC
Cloud & DevOps	Azure (AI Services, Logic Apps, OpenAI Service), Docker, CI/CD, GitHub Actions, Power BI SDK, Snowflake, Git
